

WOODS FINISH MOWERS

ESTATE SERIES™ & STANDARD-DUTY RD SERIES
REAR DISCHARGE FINISH MOWERS

NEW!

Woods RD Series
Finish Mower Model RD72
shown with optional chain shielding

PERFORMANCE GUIDE

Perfect for finish mowing with your compact or subcompact tractor.

Estate Series™ & Standard-Duty RD Series Rear Discharge Finish Mowers

Subcompact tractors 15-25 hp

Compact tractors 25-35 hp

It's been said that reputation is everything. Since 1946, Woods has built its reputation on producing attachments that work great and last a very long time. We continue that tradition by adding to our popular RD Series of rear discharge finish mowers. Introducing three new standard-duty models for your compact or subcompact tractor.

The RDC54 Finish Mower joins our Estate Series™, an entire line of attachments designed especially for your subcompact tractor. A 54-inch cutting width allows the mower to cover the tire tracks of the tractor, reducing mowing time and improving cut quality and appearance. The RD60 and RD72 models also join the RD Series. They offer the same quality cut in 60- and 72-inch cutting widths, for 25-35 horsepower compact tractors. Now you can add a manicured lawn to your tractor's list of accomplishments.

When you're ready to expand your tractor's capabilities even more, check out the other Woods Estate Series attachments like a loader, backhoe, rear grading blade, tiller, power rake, and much more.

Additional Features

- Unique deck design allows closer mowing around obstacles
- Spring loaded idler provides correct belt tension without adjustment, significantly increasing belt life
- 3-year limited gearbox warranty – home owners
- 1-year limited gearbox warranty – commercial users
- Optional chain shielding

Exceptional Cut Quality

- Heat-treated, high-lift blades ensure a finish quality cut
- Baffling and rear discharge design ensure exceptional cut, discharge, and distribution of material
- Deep deck design allows greater cutting volume and better cut quality

(over for specifications)

* Note: All RD Series models pass all applicable safety standards for thrown object and blade contact without chain shielding. However, if these units will be used in areas where the possibility of thrown objects could be hazardous to persons or property, it is strongly recommended that the optional chain shielding be used for extra protection.
